WALFORM TUBES

Features

- Reshaping of hydraulic steel & stainless steel tubes
- Tube outer diameters from 6 to 42mm
- Wall thickness from 1.5 to 5.0mm
- Meets fitting DIN 2353 standard requirement
- Low torque and equal standard
- Leak-free connections
- Viton walform seal with secondary metallic seal

Walform Tubes

Dimension Specifications

DIN 2391/C (DIN EN 10305-4) – Steel tubes for precision applications - Technical delivery conditions - Part 4: Seamless cold drawn tubes for hydraulic and pneumatic power systems

DIN 2445/2 – Seamless steel tubes for dynamic loads - Part 2: Steel tubes for precision application in fluid systems, 100 bar to 500 bar

ASTM A269 – Standard specification for seamless and welded austenitic stainless steel tubing for general service

ASTM A213 – Standard specification for seamless ferritic and Austenitic Alloy-steel boiler, Super heater and Heat-exchanger Tubes.

Benefits of Walform Tubes

- Eliminates leak path and does not allow tube pull-out easily.
- Redundant sealing for overall system performance improvement.
- Fewer components reduce material and labour cost.
- Large volume of high quality installation assemblies can be produced efficiently and consistently.
- Easy, simple, practical and safe assembly process that can be carried out by less skillsets.
- Unmistakable pressure point clearly indicates the end of the assembly travel; it makes excessive or insufficient tightening virtually impossible as the standard is consistently controlled by the machine assembly.
- Cost saving in term of manpower and material expenses.
